

PROJECT  
Ardu Xively Weather Station Receiver  
HW Ver. 1.0

- Freeduino Mega 2560.
- RF Link receiver 433Mhz 5V with external antenna of 17.3cm, soldering of ANT
- TFT Touch screen 3.2".

Note:

- Use only screens 3.2-inch TFT Touch (no 3.5 inch).
- Connect arduino Mega 2560 as written in the product datasheet.
- If the PIN Data 44, the 5V and GND of the XD-RF-5V 433Mhz receiver were committed by the connections of the TFT, for PIN Data use another digital, the 5V and GND use those near the PIN 3V, change the sketch with the new PIN Data.
